

202 Stainless Steel Coil

Qihong Stainless is a professional supplier of 202 stainless steel coils and plates. The company mainly supplies 200 series stainless steel coils, 300 series stainless steel coils, 400 series stainless steel coils and other precision stainless steel coils with a thickness of 0.02mm-4.0mm. We can ensure product quality with precision technology from processes such as cold rolling, annealing, slitting, cutting, etc.

202 stainless steel coil is a kind of 200 series stainless steel coil, which is characterized by a high phase transition temperature. At 350 ° C, the metallographic structure of 202 stainless steel will not change, that is to say, its performance will not be produced in this occasion with dramatic changes. It will only expand due to heating, and the range is still small which can be completely ignored under normal circumstances. Therefore, 202 stainless steel strip has good high temperature resistance and can be used as heat-resistant steel. It is precisely because of this characteristic that 202 stainless steel coils are widely used in architectural decoration, municipal engineering, highway guardrails, hotel facilities, shopping malls, glass handrails, public facilities and other places.

Product Parameter (Specification)

Material	202
Surface	NO.1, NO.4, 2D, 2B, BA, 6K, 8K, Mirror, etc
Thickness	0.02mm-4.0mm/Customized
Length	200-3500 mm or customized according to customer requirements
Width	2-1500 mm or customized according to customer requirements
Standard	ASTM, JIS, GB, AISI, DIN, BS, EN

Certifications	SGS ISO9001
Packing	Industry standard packaging or according to client's requirement
Brand	TISCO, POSCO, BAO STEEL, TSINGSHAN, QIYI STEEL etc .
Payment terms	L/C, T/T
Delivery time	Up to order quantity, contact us to know

The application of 202 Stainless Steel Coil

202 stainless steel is a substitute for 304 stainless steel under general use conditions. 202 stainless steel coils are widely used in construction projects, kitchen households, mechanical equipment and other purposes:

- . construction engineering - siding, stair elevator, etc.;
- . kitchen household - tableware utensils, stove panels, home appliance outer panels, etc.;
- . Other aspects - electronic equipment parts, vehicle interior and exterior decoration, structural materials, etc.
